

DIAGNOSIS: MALARIA POSITIVE

Species: *Vivax*

Stage: **Schizont**

Confidence: **77.77%**

Parasitemia: %

Quantitative Analysis	
RBCs Counted	
Infected RBCs	3
Parasitemia	%
AI Confidence	77.77%

Parasite Stage Identification	
Stage	Status
Schizont	Detected

Morphological Findings

- RBC Enlargement: Unknown
- Schüffner's Dots: Unknown
- Pigment Granules: Unknown
- Parasites Detected: 3

Clinical Recommendation

- Confirm findings with manual microscopy.
- Monitor parasitemia levels.
- Initiate antimalarial treatment if clinically indicated.
